

May 22, 2024

Dear Public Utility Commission:

As you conclude your biennial process to revise net metering rates, we the undersigned members of the Vermont General Assembly urge you to reject the Public Service Department's recommendation that would make it more costly for Vermonters to go solar through the net metering program for the seventh time since 2017.

For over a decade, net metering has been Vermonters' single most effective program for going solar. However, the compensation for net metering has declined steadily since 2017 and annual installations have fallen by a third as a result.

Given the urgency of the climate crisis before us, we ask that you make it easier, not harder for Vermonters to access net-metered solar, particularly in the built environment like homes, parking lots, and commercial buildings.

Sincerely,

Representative Peter Anthony  
Representative Julia Andrews  
Representative John Arrison
